

ENTER THE DRAW TO WIN

A SET OF CAMBRIDGE HUMANITIES AND SOCIAL SCIENCES FOR QUEENSLAND YEARS 7–10

Brighter thinking for a better future

Supporting teachers in delivering engaging, local content to guide and encourage their Year 7 to 10 students as they explore the shaping of the modern world and the various challenges faced by humanity today.

- This NEW series has been written specifically to engage Queensland students with History, Geography, Economics and Business and Civics and Citizenship. It draws on local content and examples in each topic to ensure Queensland students can relate to and genuinely connect with each subject.
- Students will also be engaged in the content through fascinating chapter openers, a visually appealing design, carefully chosen language, an extensive range of sources plus rich digital resources that bring each topic to life.
- Students are prepared for further senior studies through a sourcebased inquiry approach for history, and by the consistent use of cognitive verbs in each year level that lead into the QCE cognitive verbs at Year 10.
- Skills and concepts are integrated throughout the chapters in a wide range of activities that help students make the connection between the skill and the subject matter and allow teachers to differentiate learning to suit the needs of individual students.
- A host of additional resources created by experienced and passionate Queensland authors – particularly in areas often taught by non-specialist teachers – in addition to a powerful Learning Management System, provides extensive teacher support.
